Education

Institut Teknologi dan Bisnis Ahmad Dahlan Jakarta	South Tangerang, Banten
Faculty of Engineering and Design	Oct 2020 - Feb 2027
Undergraduate Information System (GPA=3.90, Graduated Expected: Feb 2027)	
Startup Campus	Online
Artificial Intelligent Computer Vision Track	Feb 2023 - June 2023
Independent Studies	
Makara UI Academy x Gramedia Academy x Cybertrend	
Non-Diploma Data Engineering Program	Jan 2026 - May 2026

Work/Professional Experience

Freelance WordPress & Elementor Developer	Depok, West Java
Rumah Sains Indonesia	Nov 2025 - Dec 2025
- Managed the maintenance and development of the company's WordPress website using Elementor. - Optimized site layout, navigation, and user experience (UI/UX) to enhance usability. - Updated web pages, product knowledge content, and the company's portfolio. - Ensured design consistency, content structure, and overall website functionality.	
Frasa	Depok, West Java
Staff, Socio community	2019 – Present

Projects/Portfolio Projects

GoodStat 4th Anniversary Data Visualization Competition	
Tableau QGIS Excel Canva Spatial Data (GADM)	Jul 2025
- Processed and cleaned multi-source datasets using Excel to analyze national cooking oil consumption trends and waste cooking oil generation. - Performed spatial data processing using QGIS by integrating GADM administrative boundary data to map waste oil drop-off points at the city level. - Designed an interactive Tableau dashboard featuring an engaging visual presentation beyond standard executive dashboard layouts. - Created an educational Instagram feed (via Canva) presenting data insights, environmental impacts, and actionable solutions to raise public awareness on waste oil management.	
Final Project: Railway Passenger Volume Forecasting	
Python PostgreSQL Tableau	May 2026 - Aug 2026
- Developed time-series forecasting models using Triple Exponential Smoothing and Prophet for three PT KAI operational regions. - Performed data extraction, cleaning, transformation, and validation using SQL (PostgreSQL). - Applied the OSEMN framework, conducted Exploratory Data Analysis (EDA), and engineered extra regressor variables for predictive modeling. - Optimized model performance through hyperparameter tuning and evaluated predictive accuracy using MAPE. - Presented analytical insights through Python visualizations and an interactive Tableau dashboard.	

Sales & Inventory ETL Project	Depok, West Java
Python SQL Prefect PostgreSQL Tableau	May 2026 - Aug 2026

- Designed an ETL pipeline based on the Medallion Architecture (Raw–Bronze–Silver–Gold).
- Developed data assessment, cleaning, validation, integration, and data mart processes using Python.
- Orchestrated the ETL workflow using Prefect for automation, task dependency management, and pipeline monitoring.
- Constructed fact and dimension tables while enforcing data quality validation rules.
- Developed Tableau dashboards to visualize sales and inventory metrics.

Technical Skills

- **Data Engineering & ETL:** Medallion Architecture (Raw–Gold), Pipeline Orchestration (Prefect), Dimensional Modeling (Fact & Dimension Tables), Data Assessment & Cleaning, Data Quality Validation.
- **Data Analysis & Modeling:** Exploratory Data Analysis (EDA), Time-Series Forecasting (Prophet, Exponential Smoothing), OSEMN Framework, Hyperparameter Tuning.
- **Tools & Databases:** PostgreSQL, SQL, Python (Pandas, NumPy, Scikit-learn), Tableau, Google Colab, Git.
- **Web Development:** HTML, CSS, JavaScript, PHP, WordPress, Elementor.

Additional Information

- **Languages:** Indonesian (Native), English (B2 / Intermediate)
- **Soft Skills:** Problem Analysis, Critical Thinking, Team Leadership, Communication

Certifications

- **Badan Nasional Sertifikasi Profesi (BNSP)**
 - Certified Data Analyst – Data Management Qualification (*Issued: Dec 2024 | Valid thru: Dec 2027*)
- **Kemendikbudristek x Startup Campus (MSIB)**
 - Artificial Intelligence: Computer Vision Track (*2023*)
- **Dicoding**
 - Fundamental Front-End Web Development (*2021*)
 - Fundamental Python (*2021*)
 - Data Visualization with Google Sheets (*2021*)
- **Progate**
 - HTML, CSS, Python, JavaScript, Git, Command Line (*2022*)
- **Rosetta Stone**
 - Fluency Builder (*2022*)
